

AJEDIAM

FULL STACK CODER

Position opens in October

Office:

Hoveniersstraat 19
2018 Antwerp
Belgium
9-5pm UGT+2

Company:

We are a creative e-commerce company specializing in the jewelry industry, headquartered in Antwerp, Belgium. Our team is passionate about crafting exceptional online shopping experiences for our customers, leveraging the latest technologies.

Position Overview:

We are seeking a talented Full Stack Developer to join our Antwerp-based team on a part-time basis. In this role, you will collaborate closely with our WordPress developer on a variety of development tasks, including managing a large database that serves multiple projects, including e-shops dedicated to different categories within

the diamonds and fine jewelry industry. Your primary responsibilities will include enhancing the mobile and website features of our online stores and exploring opportunities for AI integration.

Requirements:

- min. 2 years of experience with React
- min. 2 years of experience with eCommerce projects
- self-coded admin panel for website experience
- Ability to write a clean and well-organized documented code
- Proactive and a good team player
- Fluency in English
- Enthusiasm for AI integration in development

Apply at

career@ajediam.com by answering the questions below:

1. Could you tell us a brief introduction of your experience?
2. How many years of experience do you have coding using React?
3. How many eCommerce projects have you handled?
4. Do you have experience working on a website or admin panel coded by yourself from scratch? How many self-coded sites/admin panel have you worked on?
5. Please provide references of your previous projects you have handled related for this position.

Part-Time
